Fabian Riaños

Full stack enginner

Bogotá, Distrito Capital, Colombia

Experiencia

Banco Davivienda

full stack engineer

enero de 2023 - Present (3 años 3 meses)

Colombia

Experienced Software Developer based in Colombia, building secure, scalable solutions for the financial sector. I work with Java 11/17, Spring Boot (resilient microservices), Angular 14/18, and design Java libraries and adapters; I also use AWS (CloudWatch, ECS, EC2, API Gateway, Parameter Store, Secrets Manager) to deliver reliable, monitored systems. I manage CI/CD standards, contribute in Agile teams, lead production releases for high-security banking apps, and leverage AI tools like Codex, Opus, and GPT Copilot to accelerate development and improve code quality.

LABORATORIOS BUSSIE S.A

Quality control analyst

abril de 2018 - octubre de 2022 (4 años 7 meses)

Colombia

Chemical analyst experienced in quality control and validation for product release across pharmaceutical, food, cosmetic, and veterinary industries. I specialize in standardizing and validating analytical methodologies according to current pharmacopeias (USP, BP) and preparing technical reports aligned with client specifications and official compendia.

I operate HPLC (Waters) liquid chromatography systems and handle USP primary and secondary standards. I analyze raw materials, in-process samples, and finished products, applying statistical approaches such as the least squares method for individual or combined batches.

I contribute to manufacturing process validations for multiple dosage forms, review release and validation reports, and ensure the analytical control schedule is executed in compliance with GMP and GLP.

Laboratorios Biogen de Colombia

Stability analyst

febrero de 2015 - febrero de 2018 (3 años 1 mes)

Colombia

Stability analyst experienced in pharmaceutical stability studies and preparing partial and final reports for submission to INVIMA. I operate HPLC systems (Shimadzu Prominence, Elite Hitachi, Merck Lachrom) and handle USP primary and secondary standards; I build shelf-life prediction curves using the least squares method and statistical tools in Excel/StarOffice. I execute natural and accelerated stability protocols following current regulations (Resolution 2514 of 1995), ensure GMP recertification, and oversee the full stability program to meet all regulatory and quality requirements.

Educación

Corporación Unificada Nacional de Educación Superior CUN
Systems engineering, Systems engineering · (febrero de 2023 - enero de 2027)
